## Education

Eötvös Loránd University

*Bachelor in Computer Science*

Feb 2023 – Present

*Budapest, Hungary*

## Professional Experience

WaseerHost

2020 – 2022

*Web Intern*

*Kamalia, Pakistan*

- Designed responsive, user-friendly websites utilizing HTML, CSS, JavaScript, and WordPress Elementor Pro.
- Optimized site performance, reducing load time by 25% through clean coding practices and image optimization.
- Acquired expertise in CMS design, debugging, and enhancing user experiences.
- Collaborated with clients to deliver custom solutions aligned with business objectives.

## Projects

Pomodoro Timer | *React, HTML, CSS, JavaScript*

2024

- A modern, responsive Pomodoro Timer app to help you manage tasks, work sessions, and breaks effectively. Built with React, it offers task management, customizable durations, and progress tracking with analytics. [GitHub Link](#)

Reddit Multi-Lane Client | *JavaScript, HTML, CSS*

2024

- A browser-based Reddit client that allows users to view posts from multiple subreddits in customizable, responsive lanes. [GitHub Link](#)

Digital Note Taker | *Python, React, Flask, HTML, CSS, JavaScript*

2024

- A responsive, theme-switching note-taking web application with offline support using local storage and a Flask backend for full functionality. [GitHub Link](#)

Task Tracker | *HTML, CSS, JavaScript*

2023

- A simple yet efficient Task Tracker with light and dark modes, allowing users to manage tasks with options to add, delete, mark as complete, and bulk edit, while tracking progress visually. [GitHub Link](#)

GitHub Activity CLI | *Python*

2023

- A simple command line interface (CLI) to fetch the recent activity of a GitHub user and display it in the terminal. [GitHub Link](#)

Emotion-Based Movie Recommendation System | *Python, Flask, NLP*

2024

- Recommends movies based on emotional impact using user reviews and sentiment analysis. [GitHub Link](#)
